Subject: Microsoft Settlement

Sirs:

Thanks you for being open to comments on this case.

As a physicist, member of Mensa, and a person who has been involved with computers for over thirty years (e.g. as a consultant with several hundred clients), I am admittedly not your average consumer.

I want to briefly say that, in my opinion, the federal government's proposed settlement with Microsoft is an embarrassing sellout to a company that has had a LONG history of persistent, unacceptable and untrustworthy behavior.

PLEASE DO NOT IMPLEMENT ANY SUCH AGREEMENT!

Feel free to contact me for computer related matters.

John Droz, jr.
